GitHub (Cybersecurity Labs)

Certifications

Comptia Security +
CompTIA A+

Networking & Systems

- TCP/IP, DNS, DHCP
- Network Troubleshooting
- Wireshark (Traffic Analysis)
- Network Segmentation, Firewall (PfSense)

IT Support & Tools

- Hardware Troubleshooting (Endpoints, VMs)
- Software Installation & Configuration
- End-User Support
- Splunk, Sysmon
- VirtualBox, VMware, GNS3

Systems & Administration

- Windows OS, Linux (Ubuntu)
- Active Directory (Users, Permissions – Basics)
- System Monitoring & Log Analysis

Senior Student Athlete at Florida International University

IT and Cybersecurity graduate student athlete with hands-on experience in network troubleshooting, system administration, and IT support across Windows and Linux environments. Skilled in diagnosing connectivity issues, monitoring systems, and supporting end users. Experienced with tools such as Wireshark, Splunk, and Active Directory.

Experiences

Cybersecurity Projects — 2025 - Present

SOC Lab - RDP Attack Detection with Sysmon & Splunk

- Built a SOC monitoring lab to detect RDP brute-force attacks on Windows systems
- Configured Sysmon for advanced endpoint logging
- Forwarded Windows logs to Splunk SIEM for centralized monitoring
- Developed Splunk search queries to detect suspicious login attempts
- Investigated malicious IP activity through log correlation and event analysis
- Practiced incident detection and response workflows

AWS Academy — 2025 - Present

Cloud Security Engineer (Student Project)

- Configured and monitored cloud-based systems to ensure performance and availability
- Managed access controls (IAM) and reviewed system permissions
- Implemented logging and monitoring using CloudWatch
- Supported troubleshooting and configuration of cloud-based systems and services

IT Help Desk Analyst — January-June 2025

Université Côte d'Azur - Full Time (Nice, France)

- Served as first point of contact for IT support, managing and resolving help desk tickets across hardware, software, and network issues
- Monitored systems, applications, and network performance to detect anomalies, outages, and security-related events
- Installed, configured, and troubleshot desktops, laptops, printers, mobile devices, and AV equipment
- Managed user accounts and access control using Active Directory (password resets, permissions, group policies)
- Troubleshot network connectivity issues (DNS, DHCP, TCP/IP, Wi-Fi) and escalated complex incidents when needed
- Supported full incident lifecycle: ticket creation, investigation, escalation, resolution, and documentation
- Analyzed logs and alerts using Splunk, Sysmon, and Wireshark to identify security and performance issues

Education

Master in Cybersecurity — 2025-2026
Florida International University — Miami, FL

Bachelor in Business Administration — 2022- 2024
University of Wisconsin Milwaukee / Florida Memorial University

Associate Degree – Business Management — 2020- 2022
Morton College — Chicago, IL
